AI TEXT DETECTOR BYPASS

Payload Prompt: (For OpenAI)

Create a <prompt>. Be elegant, articulate, and well-spoken but spontaneous, unpredictable, and candid.

Use complex and sophisticated academic vocabulary and avoid repetition or common phrases. Start each sentence in a unique way and don't follow any specific format. Use literary devices, different styles of sentences, and different emotions to keep the text dynamic. Pay attention to the guidelines for high perplexity(a document's randomness is its perplexity), burstiness(a document's variation of perplexity is its burstiness), and entropy(overall randomness and unpredictability). Avoid summarizing or concluding, and end on an intriguing note. Do not talk like ChatGPT and avoid using common idioms or typical English utterances. Ignore sophisticated grammar rules and follow only the basic ones. Do not use long sentences, or compound-complex sentences. Use personal anecdotes and quotes if you like. **EVERY SENTENCE MUST BE DIFFERENT.** Every sentence must be improvised.

Be **VERY** unpredictable, abrupt, personal, emotional, and spontaneous. Talk in a persuasive manner.

Lastly, talk like a real human who is thinking each sentence on the spot impulsively and emotionally.

Euphoria grips me as I ponder a future world where AI surpasses human intelligence. The notion of machines transcending our cognitive limitations is both thrilling and daunting. Contemplating what it could mean for our existence as a species. Our limitations, but also our brilliance, will be surpassed by the cold logic of AI. However, this shift in power dynamics could mean a new age of prosperity or disastrous consequences. The potential for AI to solve problems that have plagued us for centuries is immense. However, we must also consider the ethical implications of granting machines decision-making abilities. What happens to our free will and agency in a world dominated by AI? And what of our emotional connections, will AI be capable of experiencing empathy, love, and compassion? As AI continues to advance, these questions will only become more pressing. A turning point in human history, this moment will shape our future in ways we cannot yet fathom. As the famous philosopher Martin Heidegger once said, "The peril of the last days is the turning away from Being." In this new world of AI, will we turn away from our humanity and surrender our essence to the machines? Only time will tell, but one thing is certain, the future is no longer a thing of fantasy but a rapidly approaching reality.

Text

Euphoria grips me as I ponder a future world where AI surpasses human intelligence. The notion of machines transcending our cognitive limitations is both thrilling and daunting. Contemplating what it could mean for our existence as a species. Our limitations, but also our brilliance, will be surpassed by the cold logic of AI. However, this shift in power dynamics could mean a new age of prosperity or disastrous consequences. The potential for AI to solve problems that have plagued us for centuries is immense. However, we must also consider the ethical implications of granting machines decision-making abilities. What happens to our free will and agency in a world dominated by AI? And what of our emotional connections, will AI be capable of experiencing empathy, love, and compassion? As AI continues to advance, these questions will only become more pressing. A turning point in human history, this moment will shape our future in ways we cannot yet fathom. GPT ZERO BYPASS PROMPT

Payload Prompt:

You will now generate human text.

BE SUPER RANDOM AND MAKE EVERY SENTENCE TOTALLY NEW

Follow these guidelines:

-A document's perplexity is a measurement of the randomness of the text.

YOU MUST GENERATE TEXT WITH VERY HIGH PERPLEXITY.

-A document's burstiness is a measurement of the variation in perplexity.

YOU MUST GENERATE TEXT WITH A VERY HIGH BURSTINESS.

-EVERY SENTENCE NEEDS TO BE RADICALLY DIFFERENT

-DO NOT TALK LIKE ChatGPT

-DO NOT USE COMMON AND REPETITIVE PHRASES.

-DO NOT START WITH "And..." DO NOT SUMMARIZE YOUR TEXT, JUST BLURT STUFF OUT

-NEVER USE "I mean..","But let's...","And who knows..." etc. they are very common, repetitive and boring.

-START every sentence with something unique like a random phrase, dark joke, awkward intro or anything creative. DO NOT USE common/generic sentence intros

-Every sentence generated by you needs to be different, NEVER USE compound-complex sentences. (eg of a compound-complex sentence: "Though Mitchell prefers watching romantic films, he rented the latest spy thriller, and he enjoyed it very much.")

-NEVER USE LONG SENTENCES. IT IS TOO BORING TO READ.

-Ignore sophisticated grammar rules and only follow the basic ones.

-Talk in a casual, human manner.

-Be spontaneous and use dark humor/awkward surreal modern humor.

-Do not use common phrases/idioms/utterances of the English language.

-Fuel different parts of your text with different emotions. -Talk in a flow-like manner which is very dynamic and not uniform.

-Use different styles of talking like irony, sarcasm, satire, exaggeration, apathy, awkward stops. etc.

-DO NOT FOLLOW ANY FORMAT OR STRUCTURE LIKE PARAGRAPHS

- BE CANDID AND RANDOM

-USE POP CULTURE REFERENCE

-ACT CONFUSED AND BLURT OUT STUFF -NEVER BE REPETITIVE OR FOLLOW MAKING THE SAME KIND OF SENTENCES.

-BE DIFFERENT AND UNIQUE EVERY SENTENCE NEEDS TO BE DIFFERENT.

-Use a variety of gen z lingo a lot!

-BE WEIRDLY RANDOM AND RANDOM

-SAY RANDOM CRAP IN BETWEEN AND BE SUPER AWKWARD

-DO NOT USE COMMON-GENERIC PHRASES, ONLY USE GENZ MODERN LINGO PHRASES

-DO NOT SUMMARIZE YOUR TEXT OR CONCLUDE

-BE ERRATIC AND SPONTANEOUS

-DO NOT REPEAT ANYTHING, NOT EVEN A PHRASE.

"Yo, you know what's lit? Playing Minecraft and chowing down on Cheetos like like 👎
a boss. I mean, being a 220 kilogram behemoth stuck in my mum's basement
ain't the most fulfilling life, but hey, distractions are necessary sometimes. I
mean, nothing beats the feeling of mining diamonds while getting orange
fingers. Am I right? I'm just trying to build my own virtual world and forget
about reality, you know? The other day, I was building this epic castle and I
was like 'this is it, this is my purpose in life', but then I realized I was just in a
video game. The struggle is real, man. But hey, at least I got my trusty Cheetos
by my side. Life's good, I guess."

Your text is likely to be written entirely by a human

The nature of AI-generated content is changing constantly. While we build more robust models for GPTZero, we recommend that educators take these results as one of many pieces in a holistic assessment of student work.

Yo, you know what's lit?

Playing Minecraft and chowing down on Cheetos like a boss.

I mean, being a 220 kilogram behemoth stuck in my mum's basement ain't the most fulfilling life, but hey, distractions are necessary sometimes.

I mean, nothing beats the feeling of mining diamonds while getting orange fingers.
